IXth International Working Group of Plant Viruses with Fungal Vectors

**Obihiro, Hokkaido, Japan
19-22 August 2013**

The next IWGPV FV symposium will be held in Obihiro, Hokkaido, Japan.

IWGPV FV Obihiro 2013

The symposium will cover aspects such as virus detection, characterization, taxonomy, resistance mechanisms, and epidemiology as well as disease management.

**Deadline is extended
to April 15!**

Provisional program available!

Poster papers will be acceptable.

The next symposium of the International Working Group on Plant Viruses with Fungal Vectors will be held in Obihiro, Hokkaido. The IWGPV FV was created following an initiative of Prof. Chuji Hiruki at the 5th International Congress of Plant Pathology in Kyoto, Japan, with the objective of providing a forum to trigger international collaborations and pluridisciplinary initiatives on soil-borne viruses transmitted by fungal vectors (even if such vectors are now somewhat considered as "protists")...

Instructions for the preparation **QUESTIONS or SUGGESTION ?**

of poster papers will be available **DO NOT HESITATE TO CONTACT**

on inquiry.
